1.INTRODUCTION

1.1 OVERVIEW

Online classes and technology have emerged as a superhero during the lockdown days. We have all been under house arrest but are still connected with the world of education. Due to the lockdown, students have not been able to stay connected with the outer world and the lack of exposure is evident. The only reprieve for the students' mental well-being has been the transition to online classes. Teachers made sure that the learning for students was not compromised, so they took a great leap forward to find solutions and create new learning environments for their students to ensure that learning never stops. With the rapid advancements in technology and the widespread availability of internet access, online education has gained significant popularity in recent years.

This project aims to delve deep into the various aspects of online education, examining its strengths, weaknesses, opportunities, and challenges. The outcomes of this project will provide valuable insights for educational institutions, policymakers, and online learning platforms to enhance the effectiveness and accessibility of online education. This analysis of the online education system aims to contribute to the ongoing dialogue on the future of education and help shape a more inclusive, engaging, and effective learning environment in the digital age.

1.2 PURPOSE

This project aims to develop various aspects of education by examining its strength and weakness. Here we are going to analyse the system which in turn answers the question how to make the learning environment effective with internet access.

2. LITERATURE SURVEY

2.1 EXISTING PROBLEM

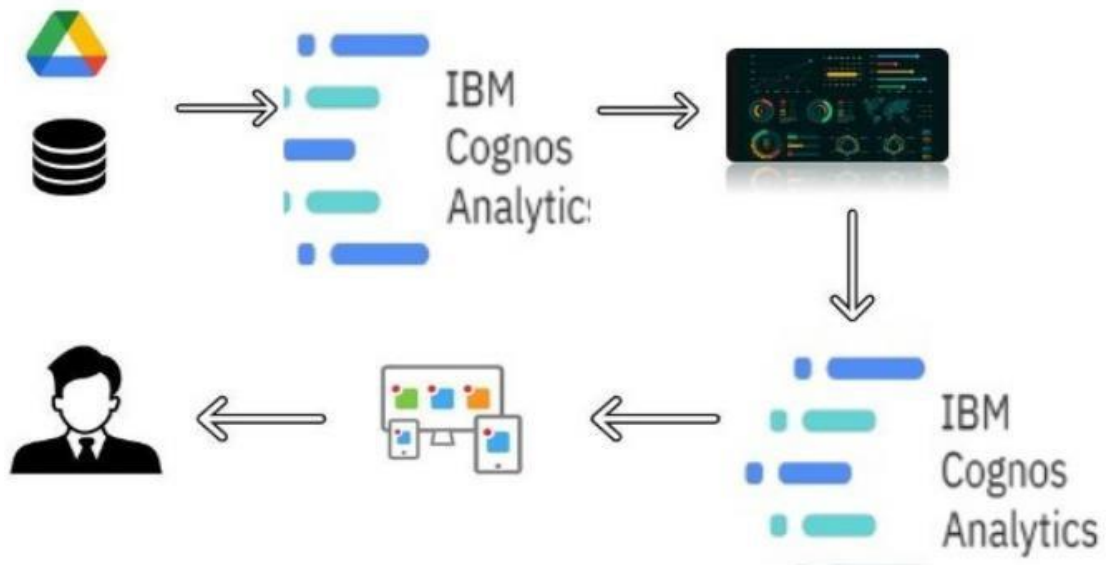

A survey for online education would involve reviewing existing research on topics related to education and student behaviour . The main problem that arise is to understand the current education system and build an effort to identify the areas where students are facing issues.

2.1 PROPOSED SYSTEM

Through the different representation we are going to analyse a solution on how the learning can be more effective with internet access.

3. THEORITICAL ANALYSIS
